Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 14-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Kimura et al. 2003/0088000.
3. Kimura et al. disclose ammonium polyphosphate, melamine polyphosphate, piperazine pyrophosphate and piperazine pyrophosphate in claims 1, 5-6 and 10, polyolefins in claims 7-11 and silicon dioxide in claim 13. For calcium stearate see paragraph 0039. Applicants' claims are not novel.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 1714

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 14-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berte' et al. 4,599,375 or Chisso Corp. JP-09-235407, in view of Brady 3,936,416 or Galli et al. 6,500,881.

7. Berte' et al. teach polyethylene, piperazine pyrophosphate, silica and melamine pyrophosphate or ammonium polyphosphate in claim 1. Chisso Corp. recites ammonium polyphosphate, piperazine pyrophosphate and melamine pyrophosphate in claims 1 and 2 and paragraphs 0009-0016, polyolefins in paragraph 0017, metallic oxides and metal stearates in paragraph 0018. Brady reveals polypropylene, ammonium polyphosphate or melamine pyrophosphate coated with stearylamine in the Abstract. Galli et al. display melamine pyrophosphate in claim 4 and stearic acid in claim 8. It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to coat the ammonium polyphosphate with stearylamine to prevent blooming and add the stearic acid in order improve the flame-retardance.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Art Unit: 1714

9. Claims 14-19 and 22-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

10. The term "higher" in claim 1 is a relative term, which renders the claim indefinite. The term "higher" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Higher than what? Numerical definition is required.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekeley whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
